

## **TERAKUU OY**

---

- **Founded in 2005**
- **Employs 4 to 5 people**
- **FileMaker experience since 1996.**

## **MAIN PRODUCTS**

---

- **TerveKuu** – ERP for environmental health and environment protection. 350 FileMaker Pro users (mainly health inspectors). 35 FileMaker Server deployments. FileMaker versions in use 11-13.
- **KliniQ** – ERP for veterinary clinics and single veterinaries. 330 users. 15 FileMaker Server deployments. 50 Runtime solutions.

## **TECHNICAL SOLUTIONS**

---

- **FMP + XML file + Java SOAP client (SSL encryption) + The Ministry of Agriculture and Forestry's KURIIRI Web Service interface.** Encrypted data transmission between TerveKuu and KURIIRI Web Service. Nationwide data collection of environmental health inspection targets, performed inspections and other work of health inspectors. Connection to inspection information published about restaurants and retail stores ([www.oivahymy.fi](http://www.oivahymy.fi)).
- **FMP + Excel file + SAP.** Invoice transfer from TerveKuu to a city's SAP system.
- **FMP + ASCII file + Pro Economica (CGI Finland).** Invoice transfer from TerveKuu to a city's financial management system.
- **FMP + ASCII file + ProE laskutus (CGI Finland).** Invoice transfer from TerveKuu to a city's financial management system.
- **FMP / FMS 11 + Neotide DW reporting system.** Report data from TerveKuu to city's reporting system. FMS 11 scheduled script does Excel export and then starts a batch file to move the files to another location.

- **FMP + FMNexus Web Services Plug-in + The Finnish Grocery Trade Association's Self-monitoring data storage Web Service.** Retail stores that are members of the association put their self-monitoring information to the service and health inspectors have access to the data through a web site. Information about health inspections is transferred to the database from TerveKuu using Web Services Plug-in.
- **FMP + FMNexus Web Services Plug-in + Textari.net service.** Sending SMS messages using POST function.
- **FMP + Base Elements Plug-in + ETT / Naseva / Sikava (Animal Disease Prevention Association).** Veterinarian receives cattle and pig information to KliniQ and sends treatment and medication information.
- **FMP + 360Works ScriptMaster.** Patient information to X-ray machines work list.
- **FMP + Troi Serial Plug-in + blood analysers.** Receive blood work results from analysers. Graph data is presented with FileMaker Graphs.
- **FMP + Payment terminals.** Example using Troi-Serial Plug-in. Device integration with Point YOMANI system which is very popular in Finland. Reseller of YOMANI payment terminals.
- **Three light services with IWP.** Public services and an extranet system.
- **FMS/FMP + 360Works Email Plug-in** – TeraKuu's CRM email-integration. 800 emails per month (received and sent).
- **360Works ScriptMaster** – Custom plug-in to different usages (file management, FTP-transfers, etc...).
- **FMP + 360Works ScriptMaster custom plug-in.** Google Calendar –integration in KliniQ. Patients scheduled appointments to Google Calendar.
- **FM Calendar.** Used in CRM-solution. Heavily using SQL queries, Web viewer + Javascript functionality and pop-overs (FMP 13).
- **FMP / FMS + 360Works Web Services Manager + Base Elements Plug-in.** Vyyhti-service in which data is transferred from KliniQ Runtime via Web Service messages to a central storage for reporting.
- **FMP / FMS + PHP + FMNexus Web Services Plug-in + 360Works Web Services Manager.** Animal treatment information from KliniQ to a web site for an insurance company. Web page uses PHP to get information from a web Service that uses FileMaker Database and scripts. Insurance decisions are read with scheduled FileMaker Server scripts.

- **FMP / FMS + FMNexus Web Services Plug-in (Base Elements in the future).** Integration with several laboratory services (ie. VetLab, Movet, Idexx). Information is transferred using TeraKuu's Web Service or with laboratory's own Web Service.
- **FMP + FMNexus Web Services Plug-in.** Smart phone notifications to send message from KliniQ to a veterinary's smart phone (patient is signed in, closing cash register, etc...). Works with Android (NotifyMyAndroid), iPhone (Prowl), Lumia (Toasty).
- **FMP + Citrix and Terminal Services.**
- **FileMaker WebDirect.** Healthcare survey software. PSA software.
- **Web Calendar with Javascript+PHP. FileMaker database as backend.**
- **FileMaker Go development**
- **FileMaker Runtime as Windows Service.** PDF printing robot. SFTP backups etc.
